## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Jones et al 5,709,043. Jones shows a method of constructing an excavation support wear member (nose 12, releasable tooth; claims 2-3) providing a support structure (adapter 30; claim 2) having a projection exterior surface portion through a connector opening transverse to the axis of the forward direction, mounting in the connector opening a connector pin in a manner to be rotated (due to beveled edge) without appreciable movement to the connector pin (relative terminology that does not preclude the application of this reference), providing a wear member with a cavity, mounting the wear member and releasably locking the wear member on the support member (shown in figure ).

As concerns claim 4, Jones shows the member and releasably locking the wear member on the support member (fig. 16) that can be rotated into position to block removal of the wear member.

***Allowable Subject Matter***

3. Claims 5-7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
